EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	*Astronomy; *Earth Science; Elementary Secondary Education; Science Activities; *Solar System; *Space Exploration; *Space Sciences; Stars; Teaching Guides; Videotape Recordings
IDENTIFIERS	*Moon

ABSTRACT

This videotape recording answers key questions about the Moon such as, What keeps it revolving around the Earth?, Why do we see only one side of the Moon?, and What is the origin of the Moon? Students learn about how the Moon has been studied throughout history, including recent lunar missions, its phases, eclipses, and how it causes tides on Earth. A hands-on activity demonstrates the effect of the Moon's gravity on weight. Contents include a teacher's guide designed to help science teachers in grades 5-8 by providing a brief synopsis of the program, pre-viewing and follow-up questions, activities, vocabulary, and additional resources.
